Junior Fullstack Developer

Full-Stack Developer with 2 years of experience designing and delivering scalable web applications across the full development lifecycle. Proficient in React.js, Next.js, Node.js, Express.js, and TypeScript, with hands-on experience in RESTful API development, database architecture, and cloud deployment. Proven ability to build responsive dashboards, integrate third-party APIs, and manage application state using Redux and Zustand. Experienced in both SQL and NoSQL databases including MongoDB, MySQL, and SQL Server. Adept at collaborating with cross-functional teams to ship production-ready, maintainable software.

SKILLS

Frontend: HTML5, CSS, Tailwind CSS, Bootstrap, Javascript, Typescript, React JS, Vue JS, Next JS, Redux Toolkit, Zustand, Pinia, Styled Components

Backend: Node JS, Express JS, Prisma, RESTful API Integration, Firebase, Firebase Cloud Functions

Database & Tools: MongoDB, Mysql, SQL Server, Git, Github, Vercel, Netlify, Axios, Postman

WORK EXPERIENCE

Dedev.co • Jul 2025 - Present

Lahore, Pakistan

Junior Fullstack Developer

- Architected and developed full-stack dashboard applications using React.js, Next.js, and TypeScript, improving data visibility and workflow efficiency for end users
- Built and maintained secure RESTful CRUD APIs using Node.js and Express.js, incorporating JWT-based authentication, role-based authorization, and input validation
- Integrated MongoDB, MySQL, and SQL Server databases with Prisma ORM, optimizing query performance and ensuring consistent data synchronization across frontend and backend
- Implemented global state management solutions using Redux Toolkit and Zustand, reducing prop-drilling and improving component reusability across large-scale applications
- Deployed and maintained production applications on Firebase Hosting, Vercel, and Netlify
- Deployed full-stack applications to Firebase Hosting, Vercel, and Netlify, ensuring stable, scalable production environments.
- Developed Firebase Cloud Functions to automate serverless backend workflows and power real-time push notification systems
- Collaborated in agile cross-functional teams, participating in code reviews and contributing to architectural decisions that improved overall system performance

Teams.pk • Apr 2024 - Jun 2025

Lahore, Pakistan

Front-End Developer

- Rebuilt and optimized the UI for POS (Point of Sale) and KDS (Kitchen Display System) products using Vue 3 and Tailwind CSS, resulting in a more responsive and maintainable interface

- Developed and maintained a feature-rich admin panel with clean data management workflows and a fully responsive design across device sizes
- Engineered reusable, modular UI components that standardized design patterns and reduced development time across multiple products
- Integrated RESTful APIs using Axios and managed application-wide state with Pinia, ensuring reliable data flow and consistent UI behavior
- Collaborated with backend engineers on Laravel-based tasks, contributing to API contracts and resolving integration issues

Frontend Developer Intern • Internship

- Contributed to UI improvements and bug fixes on live production projects, maintaining design consistency across pages
- Developed multiple responsive landing pages using Vue.js and Tailwind CSS with a mobile-first approach
- Assisted in API integration and component updates, supporting backend coordination to improve overall user experience
